# STAMP NEWS FROM UKRAINE

**01.09.2022**

More than six months after the beginning of the invasion of the Ukraine, there is still to end in sight, but the 35+ million Ukrainians, also including Trodat's local business partner Trodat Ukraine, are gradually returning to a certain daily routine.

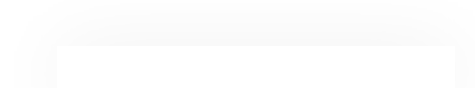

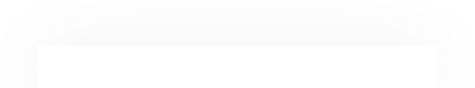

The regular contact and weekly video conferences with Trodat Ukraine occasionally provide information and pictures that rarely make it on the 8 o'clock evening news here in Austria. Last week, for example, president Selensky visited a primary school in Irpin that had been almost completely destroyed at the beginning of the invasion. For this year's back to school day, president Selensky gave a motivational speech to the newly-matriculated primary school pupils, praising their courage and also outlining them as the big hope for the country's future.

The visit also featured a very famous dog, that has been part of the army's bomb sniffing squad and recently was featured on a series of postage stamps. He was also present when president Selensky stamped a series of postcards for the kids which featured these postage stamps. Due to its strong presence at the Ukraine Post Office, Trodat (or Mr. Selensky 😊) had the privilege to see these postcards stamped with Trodat's very-own custom-designed 4924 in Ukraine colors.
